Machine Learning for DNA Artifact Classification
Low Template DNA (LTDNA) Analysis

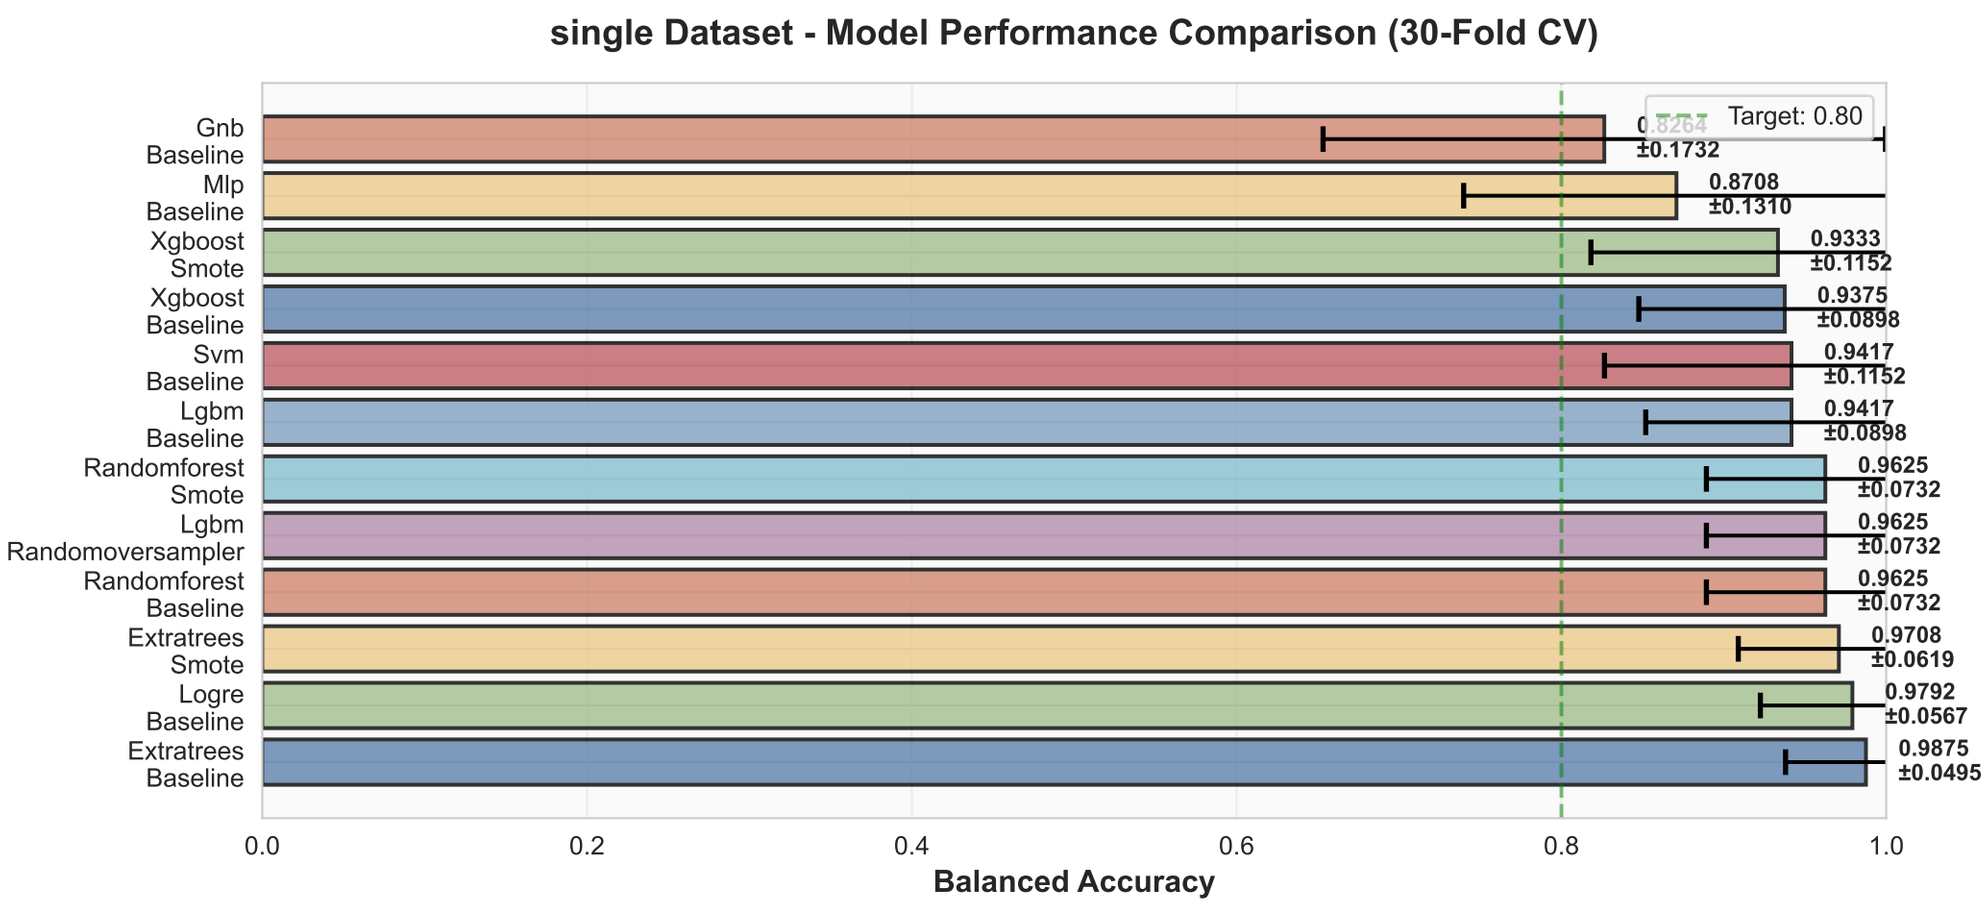

EXECUTIVE SUMMARY REPORT
Cross-Validation Results (30-Fold)

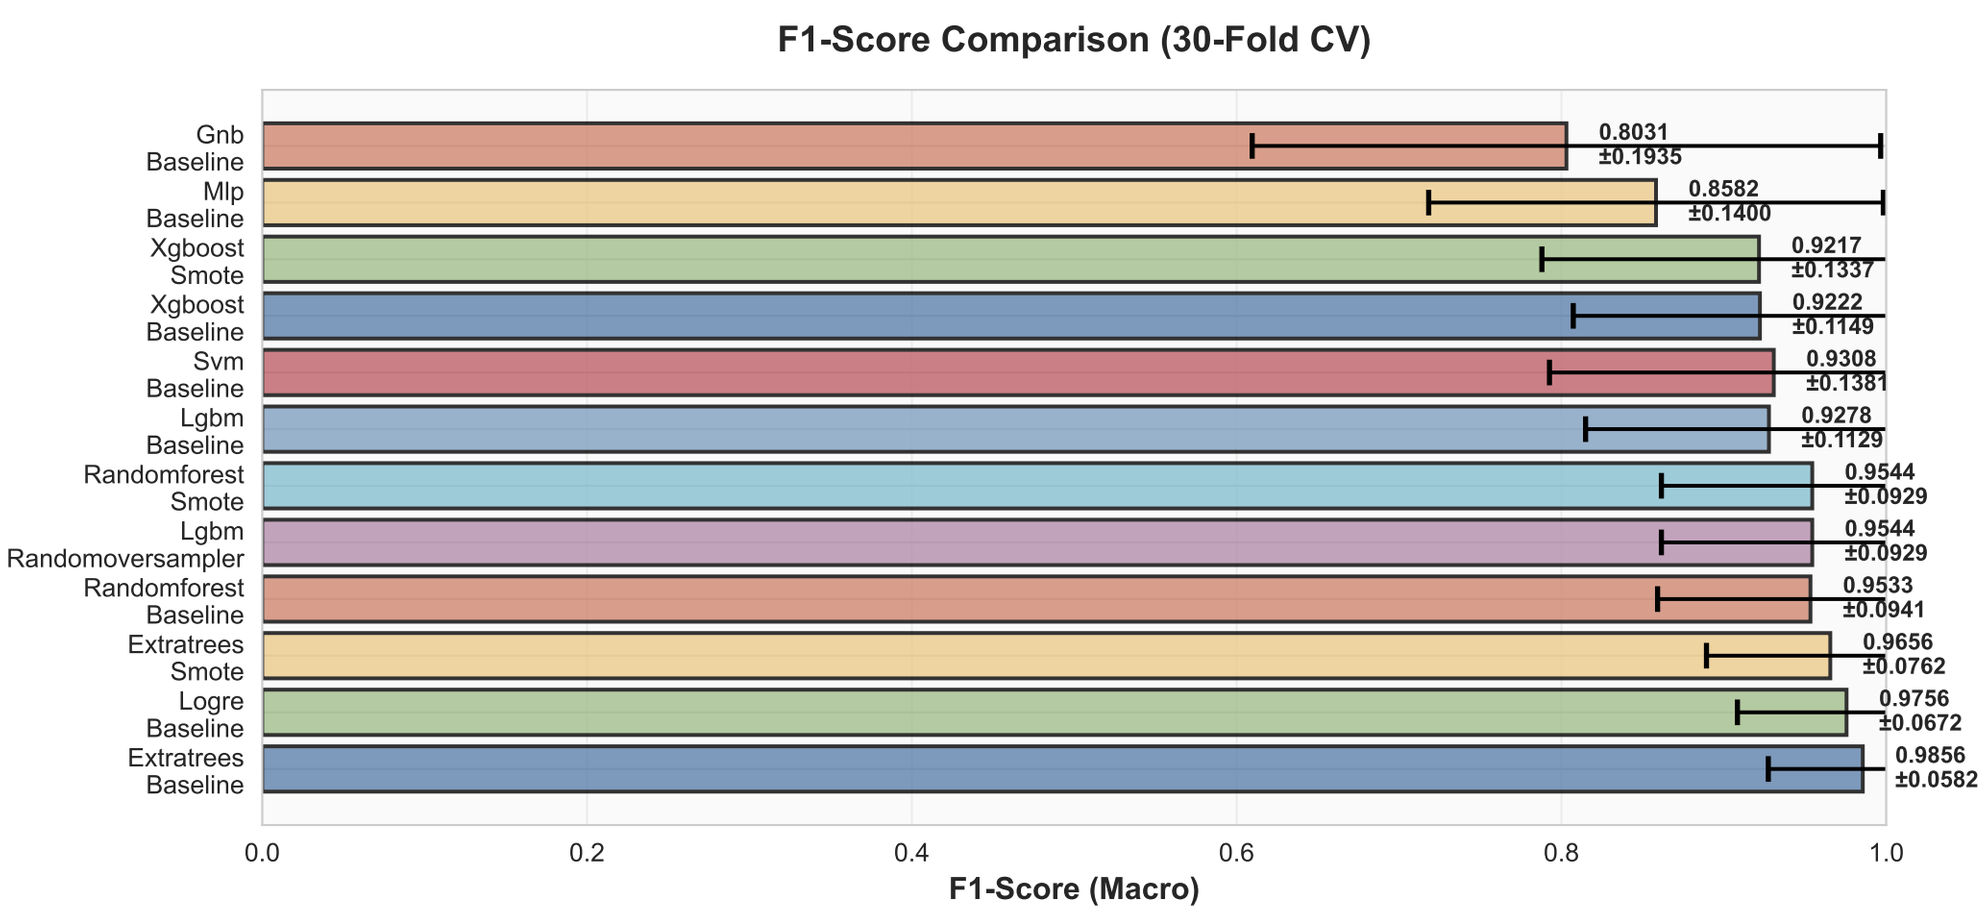

Dataset: single Profiles
Date: March 08, 2026
Validation: 30-Fold Stratified Cross-Validation
Models Evaluated: 12

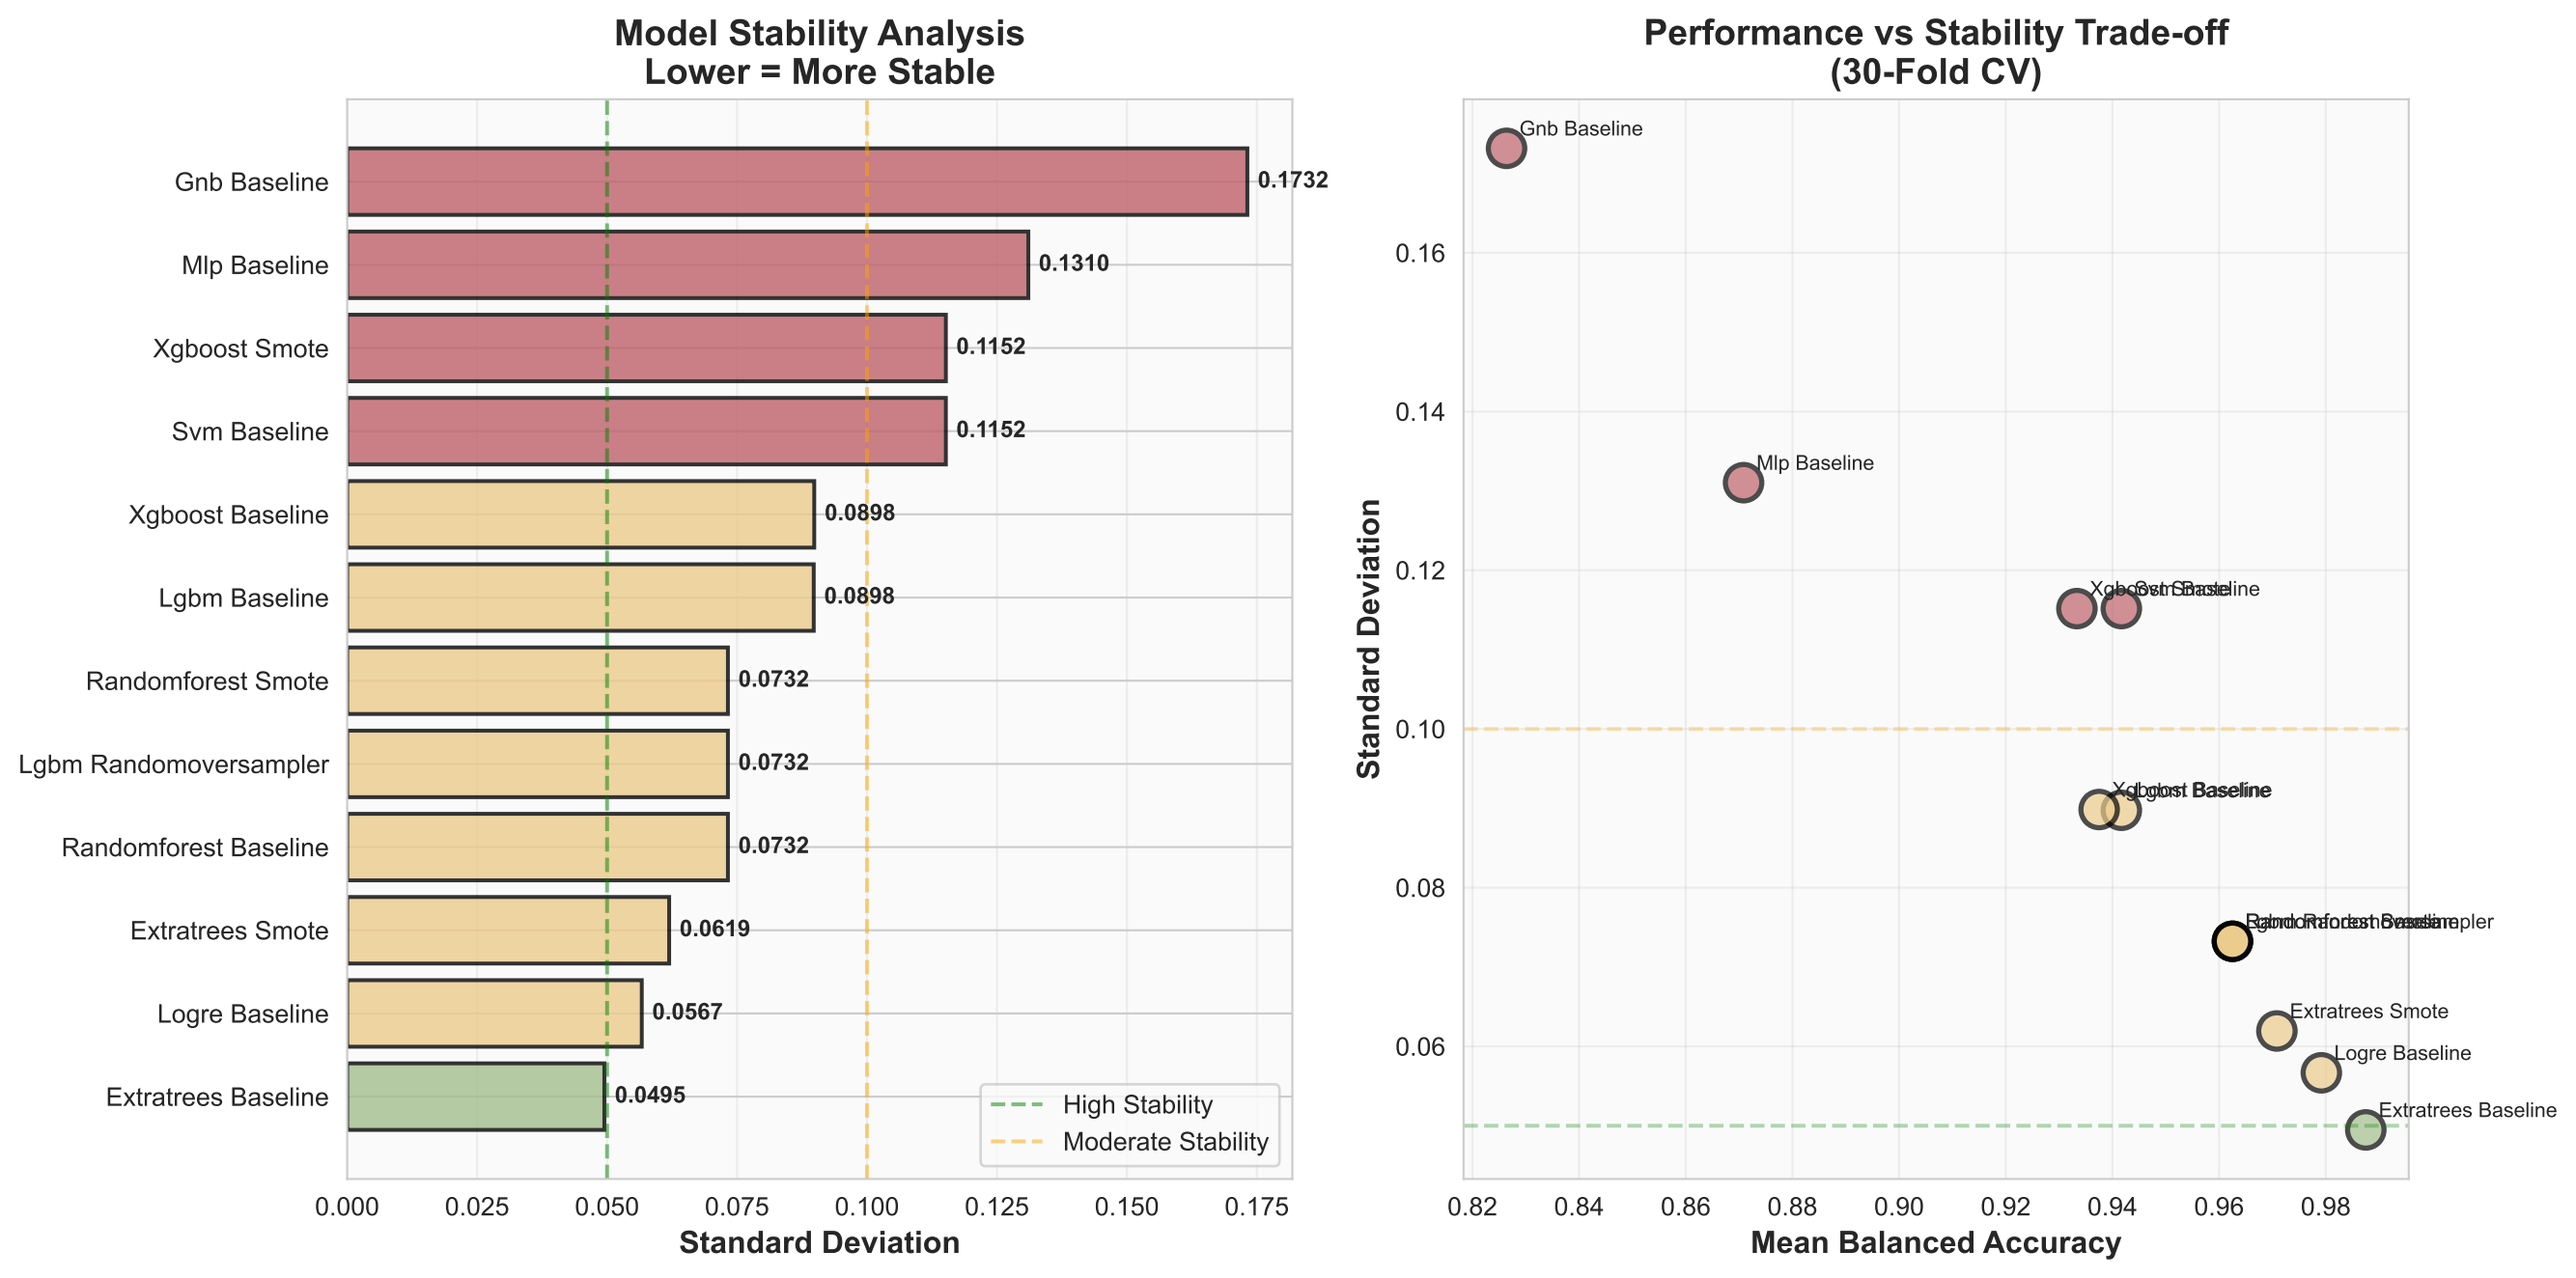

KEY FINDINGS

 Best Model: Extratrees Baseline
• Balanced Accuracy: 0.9875 ± 0.0495
• F1-Score (Macro): 0.9856
• Stability: High

 Validation Approach:
• 30-fold stratified cross-validation
• Ensures robust performance estimates
• Accounts for data variability
• Reduces overfitting bias
